A 2-Day Seminar with

Hamparsum Bozdogan

Bocconi

A New Modern Approach to Statistical Data Mining Using Information Complexity and the Genetic Algorithm

Monday, 14 September 2:30pm
Room N31 piazza Sraffa 13

- A Short Overview of Data Mining & Statistical Methodology During the Last Five Years
- The General Theory and Applications of a New Information Complexity (ICOMP) Class Criteria for Model Selection
- Simultaneous Model Selection in Multivariate Mixture Model Cluster Analysis Using Information Complexity and the Genetic Algorithm: M3

Tuesday, 15 September 9:30am
Room N30 piazza Sraffa 13

- New Advances in Regression Model Selection Using Information Complexity and the Genetic Algorithm
- Lab Applications of Model Selection
