

Copy of email circulated Nov 17, 2013

Dear IASE members, and all those interested in statistics education.

Enclosed please find a Call for Papers for Invited Paper Sessions (IPS) For the World Statistics Congress, Rio de Janeiro, Brazil, July 26-31, 2015. Please submit by \*15-Dec-2013\* your proposal to the IASE representative for WSC60: Bruno de Sousa at: < bruno.desousa@fpce.uc.pt >, and copy (cc) your email to: < iddo@research.haifa.ac.il >. Feel free to contact Bruno ASAP if you want to discuss a general idea for an invited session at the WSC60. Proposals can be submitted both by IASE members and non-members.

Please note: WSC60 will be a large and exciting event with many sessions, panels and papers coordinated by all ISI Associations - and with lots of Brazilian hospitality!. At the WSC60, there will be several channels for presenting ideas and work related to statistics education: in addition to Invited Paper Sessions which IASE will sponsor directly, as explained in the enclosed file you can also submit directly to the Local Program Committee (LPC) of the WSC60 a proposal for a Special Topic Session (STS Deadline: May 16, 2014), or send to the LPC a single paper proposal for inclusion in Contributed Paper Sessions, or in Poster Sessions. Details at: [www.isi2015.ibge.gov.br](http://www.isi2015.ibge.gov.br).

In addition, our **2015 IASE Satellite meeting** will be held in Brazil just before WSC60, with special features. News coming soon on the IASE website: <http://iase-web.org>.

Reminder about the exciting **9th Int'l Conference on Teaching Statistics**, July 13-18, 2014, Flagstaff, Arizona, USA. Start planning for your participation at ICOTS9, which promises to be a lively and very informative meeting. **ICOTS** draws together hundreds of people from across the globe who are interested in statistics education and learning in diverse contexts, including graduate students, statisticians and practitioners, researchers, teachers and teacher-educators, specialists involved in teaching statistics in tertiary and academic institutions, and many others, both new and experienced in our dynamic domain.

ICOTS9 will combine a dynamic scientific/professional program with a social program, all set in an informal atmosphere, and will take place in a unique venue near world-class attractions such as the Grand Canyon and Sedona. For details about ICOTS9 see: <http://icots.net/9>.

I invite you to consider participation in these upcoming events, and to keep in touch if you have ideas or questions related to IASE in general.
