

PhD in Statistics
Call for applications for PhD student positions with and without fellowship

Within the Doctoral School at Bocconi University, the four-years Ph.D. program in Statistics gives a solid grounding for high level research in Universities and international research institutions.

The curricula covers fundamentals of Probability and Statistics and applications. Students acquire a deep methodological preparation and specialized skills, through the first and second year courses. The third and fourth years are entirely devoted to research. Dedicated mentorship is offered to students throughout their time at Bocconi. Multidisciplinary interchange with other graduate programs in Bocconi's PhD school is encouraged. The program includes monographic courses held by visiting professors from the most prestigious Universities and research institutions.

The Ph.D. in Statistics is designed for highly motivated students who wish to undertake first rate research careers in theoretical or applied Statistics and decision sciences. Career opportunities also include central banks, governments and international organizations, and financial institutions. In the last years our students in Statistics have been hired by prestigious schools and organizations.

Highly qualified and motivated students with M.Sc. degrees in Statistics, Mathematics, Economics, Engineering, as well as other quantitatively-oriented fields, are encouraged to apply for admission.

Applicants should hold or be on their way to hold a graduate degree or equivalent.

The PhD School offers a maximum no. of 8 student positions for the PhD in Statistics, with and without fellowship. See the full official call – attached – or visit www.unibocconi.eu/admissionphd for all information.

Applications are due by January 31th, 2014.

For more information about the program, its courses and the admission procedures, please feel free to contact our Program Assistant at infophd@unibocconi.it or visit our website www.unibocconi.eu/phdstatistics
