

CUSSB 14° ANNIVERSARY

TUESDAY 29 JANUARY 2019

Vita-Salute San Raffaele University

15:00 - Aula San Tommaso (Dibit 1)

DATA INTEGRATION: A GENERAL OVERVIEW

Welcome and introduction by CUSSB Director
Prof. Clelia Di Serio, Vita-Salute S. Raffaele University

Prof. Pier Luigi Conti, Dipartimento di Scienze Statistiche,
Sapienza Università di Roma

Abstract

The increasing need of statistical information, the increasing cost of ad hoc statistical surveys with a decreasing participation rate, and the increasing number of sources of information, are common today's problems.

A promising response is to integrate data from different sources into a unique, synthetic data-file containing all necessary information. Data integration plays an important role in data gathering process, with serious consequences in data usage.
