Call for abstracts

2019 International Total Survey Error

Date:

June 10-12, 2019

We would like to invite all researchers interested in the Total Survey Error paradigm to submit an abstract to the 2019 edition of the International Total Survey Error Workshop (ITSEW).

The 2019 ITSEW will be held on June 10-12 at the University of Bergamo, Italy. Before the start of the workshop on Monday 10, there will be a short primer on Total Survey Error given by Prof. Lars Lyberg (Stockholm University). The workshop will feature a keynote address by Prof. Peter Lynn (University of Essex).

ITSEW is aimed at statisticians, survey managers and methodologists, pollsters, public opinion researchers, and marketing research professionals focused on survey quality and the challenges of combined data products. Through presentations and exchange of information the workshop aims to support a better understanding of total survey error.

The theme of the 2019 workshop is “**Integration of surveys and alternative data sources**”.

We welcome submissions on any topic related to total survey error, but especially encourage contributions on:

- Total error frameworks for Big Data, integrated data sets and products
- “Total statistical uncertainty” frameworks for estimates derived from nonprobability samples
- Statistical disclosure limitation error
- Uses of administrative data to reduce TSE
- Methods for addressing specification errors in integrated data sets
- Minimizing TSE by adaptive design and data collection strategies

If you would like to present research at the workshop, please submit an abstract (max. 400 words) to itsew2019@unibg.it by **March 15th, 2019**. Please indicate whether you would like to present a paper or a poster. Presentations on research still in progress are highly encouraged. Be prepared to share a (preliminary) paper with the organizers prior to the workshop so that all attendees can prepare for discussion.

Applicants will be notified of the acceptance of their abstracts by the end of March.

Further information is available at <https://dsaemq.unibg.it/itsew2019>
