

GRAFICI DELLE REGIONI ITALIANE: MODELLO SIR
R. Battiston 20-04-2020

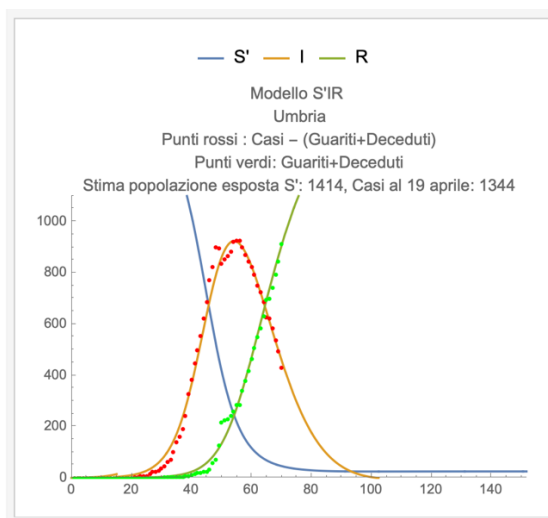

CASO CINESE-epidemia risolta

CASO AUSTRIACO-epidemia sotto controllo in via di soluzione

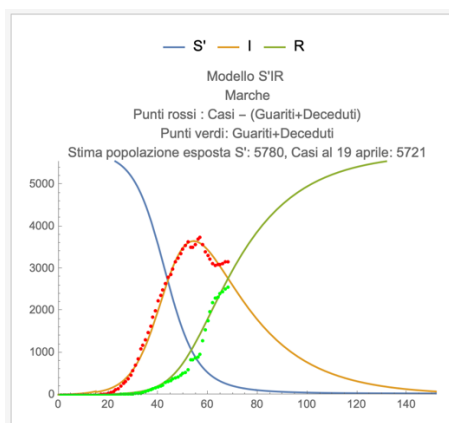

12 REGIONI ITALIANE HANNO SUPERATO IL PICCO DELLA CURVA DEI CASI CONTAGIOSI

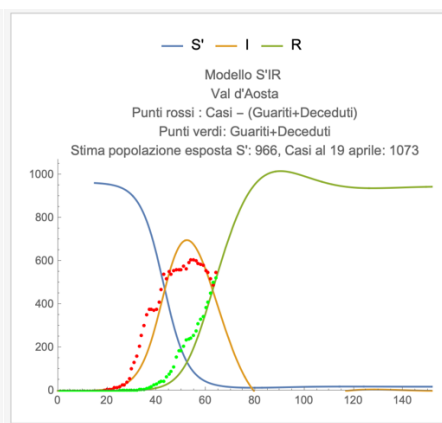

Umbria

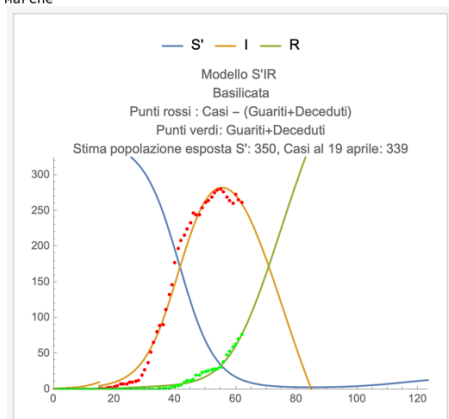

Umbria: molto simile al caso austriaco, epidemia in fase conclusiva e sotto controllo
Le altre 11 regioni seguiranno l'andamento dell' Umbria nei prossimi giorni

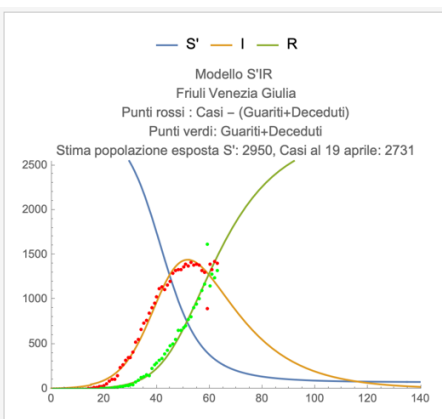

Marche

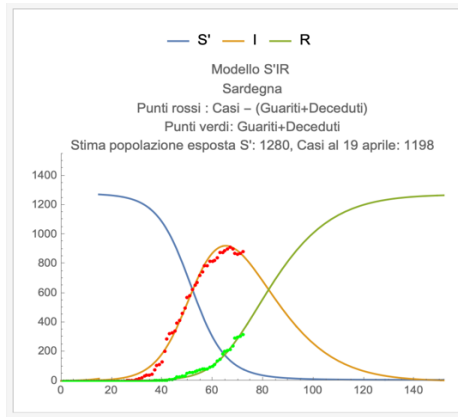

Valle d'Aosta

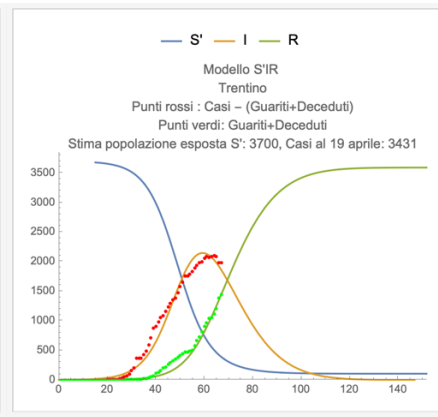

Basilicata

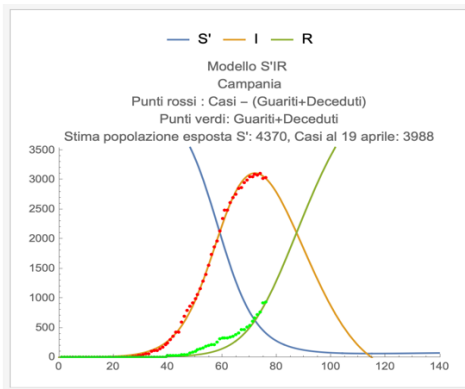

Friuli Venezia Giulia

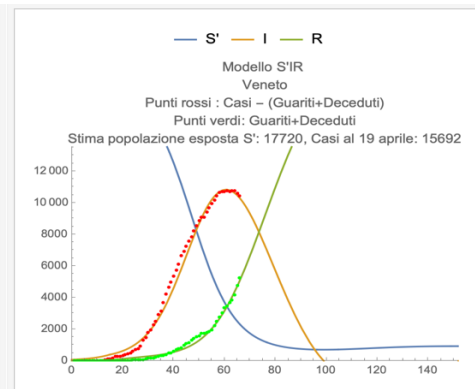

Sardegna

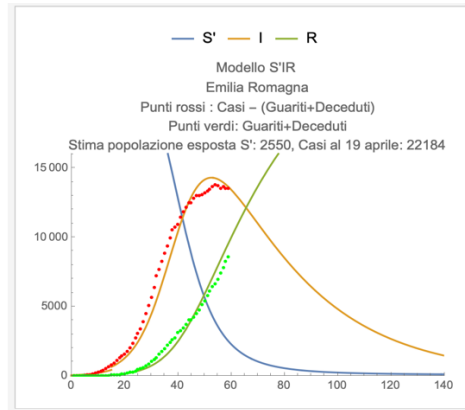

P.A. Trento

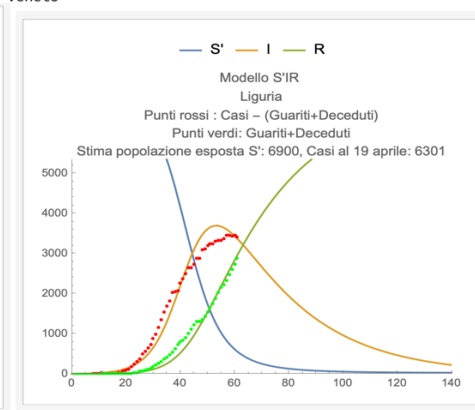

Campania

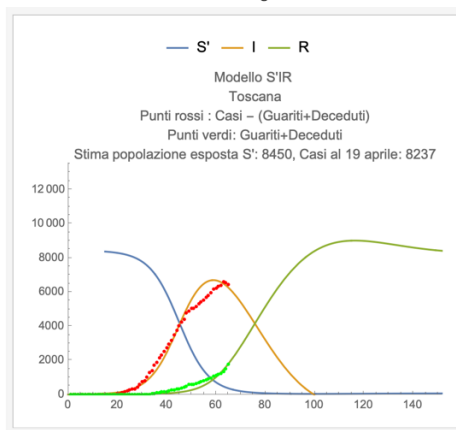

Veneto

Emilia-Romagna

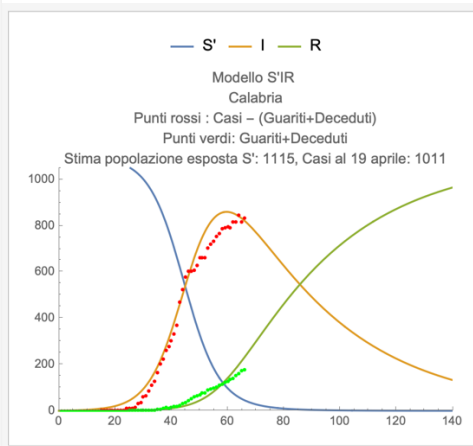

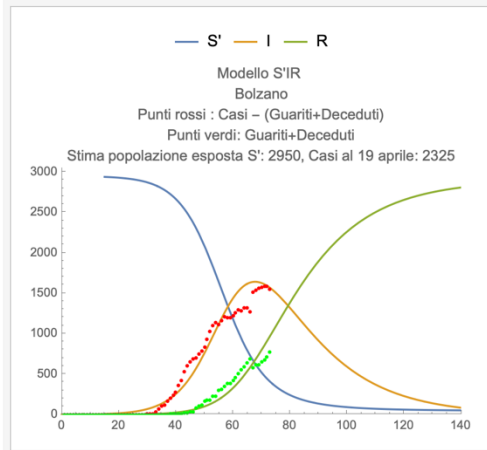

Liguria

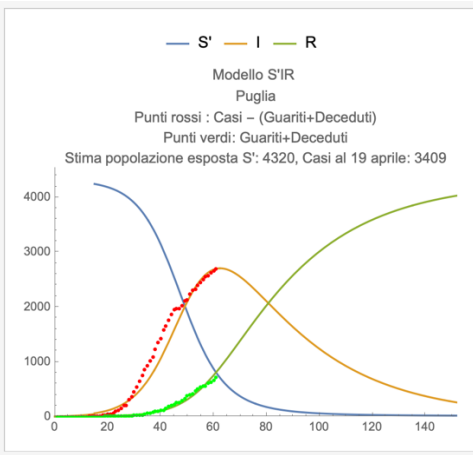

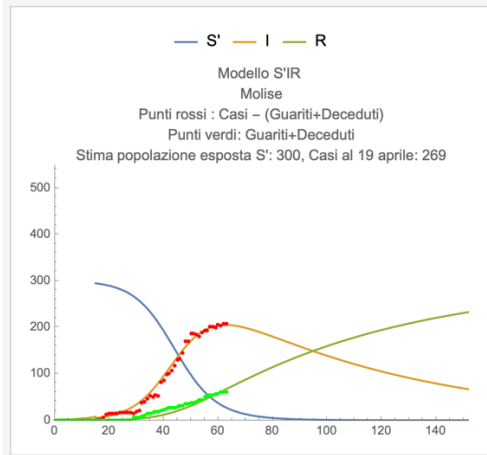

Toscana

4 REGIONI ITALIANE VICINE AL MASSIMO DELLA CURVA DEI CASI CONTAGIOSI

P.A. Bolzano

Calabria

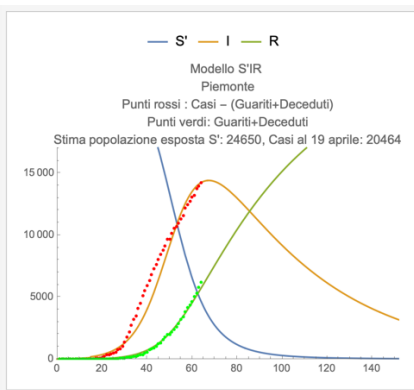

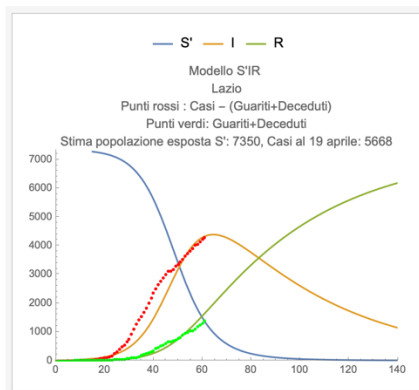

Molise

Puglia

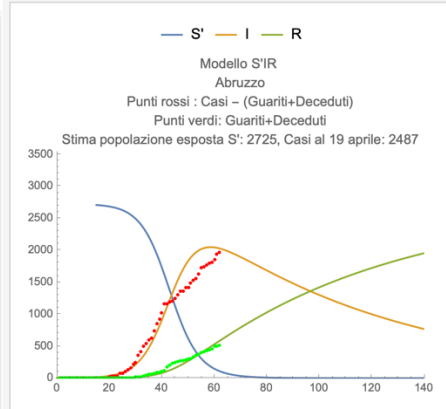

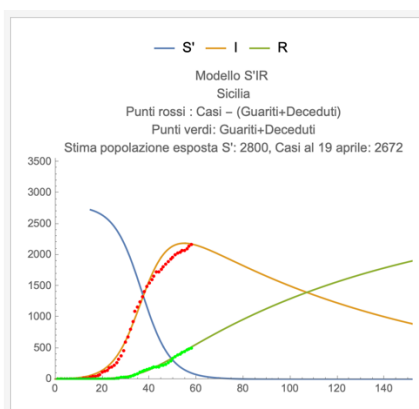

Nella prossima settimana queste regioni dovrebbero superare il massimo ed iniziare a scendere

4 REGIONI ITALIANE CHE DEVONO ANCORA RAGGIUNGERE MASSIMO DELLA CURVA DEI CASI CONTAGIOSI

Lazio

Piemonte

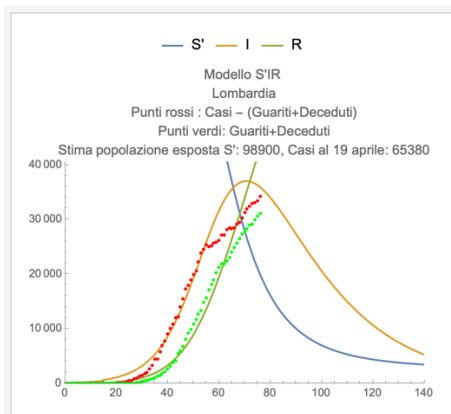

Sicilia

Abruzzo

Tre grandi regioni non hanno ancora raggiunto il massimo e stanno crescendo

1 REGIONE ITALIANA (LOMBARDIA) DI DIFFICILE INTERPRETAZIONE MA ANCORA NETTAMENTE IN FASE CRESCENTE

Lombardia
