

## Articles in scientific journals

- [1] Bartolucci, F. (2009), On the conditional logistic estimator in two-arm experimental studies with non-compliance and before-after binary outcomes, *Statistics in Medicine*, *in press*.
- [2] Bartolucci, F. and Nigro, V. (2009), A Dynamic Model for Binary Panel Data with Unobserved Heterogeneity Admitting a root-n Consistent Conditional Estimator, *Econometrica*, *in press*.
- [3] Bartolucci, F. and Farcomeni, A. (2010), A Note on the Mixture Transition Distribution and Hidden Markov Models, *Journal of Time Series Analysis*, **31**, pp. 132-138.
- [4] Bartolucci, F. and Farcomeni, A. (2009), A multivariate extension of the dynamic logit model for longitudinal data based on a latent Markov heterogeneity structure, *Journal of the American Statistical Association*, **104**, pp. 816-831.
- [5] Bartolucci, F., Lupparelli, M. and Montanari, G. E. (2009), Latent Markov model for longitudinal binary data: an application to the performance evaluation of nursing homes, *Annals of Applied Statistics*, **3**, pp. 611-636.
- [6] Bartolucci, F. and Lupparelli, M. (2008), Focused information criterion for capture-recapture models for closed populations, *Scandinavian Journal of Statistics*, **35**, pp. 629 - 649.
- [7] Bartolucci, F. and Pennoni, F. (2007), On the approximation of the quadratic exponential distribution in a latent variable context, *Biometrika*, **94**, pp. 745-754.
- [8] Bartolucci, F. and Nigro, V. (2007), Maximum likelihood estimation of an extended latent Markov model for clustered binary panel data, *Computational Statistics and data analysis*, **51**, pp. 3470-3483.
- [9] Bartolucci, F. and Pennoni, F. (2007), A class of latent Markov models for capture-recapture data allowing for time, heterogeneity and behavior effects, *Biometrics*, **63**, pp. 568-578.
- [10] Bartolucci, F. (2007), A penalized version of the empirical likelihood ratio for the population mean, *Statistics and Probability Letters*, **77**, pp. 104-110.
- [11] Bartolucci, F. (2007), A class of multidimensional IRT models for testing unidimensionality and clustering items, *Psychometrika*, **72**, 141-157.
- [12] Bartolucci, F., Colombi, R. and Forcina, A. (2007), An extended class of marginal link functions for modelling contingency tables by equality and inequality constraints, *Statistica Sinica*, **17**, pp. 691-711.
- [13] Bartolucci, F., Pennoni, F. and Francis, B. (2007), A latent Markov model for detecting patterns of criminal activity, *Journal of the Royal Statistical Society, series A*, **170**, pp. 115-132.
- [14] Bartolucci, F. and Forcina, A. (2006), A class of latent marginal models for capture-recapture data with continuous covariates, *Journal of the American Statistical Association*, **101**, pp. 786-794.
- [15] Bartolucci, F. (2006), Likelihood inference for a class of latent Markov models under linear hypotheses on the transition probabilities, *Journal of the Royal Statistical Society, series B*, **68**, 155-178.
- [16] Bartolucci, F., Scaccia, L. and Mira, A. (2006), Efficient Bayes factor estimation from the Reversible Jump output, *Biometrika*, **93**, pp. 41-52.
- [17] Bartolucci, F. and Montanari, G. E. (2006), A new class of unbiased estimators for the variance of the systematic sample mean, *Journal of Statistical Planning and Inference*, **136**, pp. 1512-1525.
- [18] Bartolucci, F. (2005), Clustering univariate observations via mixtures of unimodal normal mixtures, *Journal of Classification*, **22**, pp. 203-219.
- [19] Bartolucci, F. and Forcina, A. (2005), Likelihood inference on the underlying structure of IRT models, *Psychometrika*, **70**, pp. 31-43.
- [20] Bartolucci, F. and Scaccia, L. (2005), The use of mixtures for dealing with non-normal regression errors, *Computational Statistics and Data Analysis*, **48**, pp. 821-834.
- [21] Forcina, A. and Bartolucci, F. (2004), Modelling quality of life variables with non-parametric mixtures, *Environmetrics*, **15**, pp. 519-528.
- [22] Bartolucci, F. and Scaccia, L. (2004), Testing for positive association in contingency tables with fixed margins, *Computational statistics and Data Analysis*, **47**, pp. 195-210.
- [23] Bartolucci, F. and De Luca, G. (2003), Likelihood-based inference for asymmetric stochastic volatility models, *Computational Statistical and Data Analysis*, **42**, pp. 445-449.
- [24] Bartolucci, F. and Forcina, A. (2002), Extended RC association models allowing for order restrictions and marginal modelling, *Journal of the American Statistical Association*, **97**, pp. 1192-1199.
- [25] Bartolucci, F. and Besag, J. (2002), A recursive algorithm for Markov random fields, *Biometrika*, **89**, pp. 724-730.

- [26] Bartolucci, F., Forcina, A. and Dardanoni, V. (2001), Positive Quadrant Dependence and Marginal Modelling in two-way tables with ordered margins, *Journal of the American Statistical Association*, **96**, pp. 1497-1505.
- [27] Bartolucci, F. and Forcina A. (2001), Analysis of capture-recapture data with a Rasch-type model allowing for conditional dependence and multidimensionality, *Biometrics*, **57**, pp. 714-719.
- [28] Bartolucci, F. and De Luca, G. (2001), Maximum likelihood estimation for a latent variable time series model, *Applied Stochastic Models for Business and Industry*, **17**, pp. 5-17.
- [29] Bartolucci, F. (2001), Developments of the Markov chain approach within the distribution theory of runs, *Computational Statistics and Data Analysis*, **36**, pp. 107-118.
- [30] Bartolucci, F. and Forcina A. (2000), A likelihood ratio test for  $MTP_2$  within binary variables, *The Annals of Statistics*, **28**, pp. 1206-1218.

### **Chapters and articles in books**

- [31] Bartolucci, F. and Scrucca, L. (2009), Point Estimation Methods with Applications to Item Response Theory Models, *International Encyclopedia of Education, 3rd Edition*, Editors: B. McGaw, E. Baker and P. P. Peterson, Elsevier, *in press*.
- [32] Bartolucci, F., Pennoni, F. and Lupparelli, M. (2008) Likelihood inference for the latent Markov Rasch model, *Mathematical Methods for Survival Analysis, Reliability and Quality of Life*, Wiley, pp. 239-254.
- [33] Scaccia, L. and Bartolucci, F. (2005), A Hierarchical Mixture Model for Gene Expression Data, *New Developments in Classification and Data Analysis*, (editors: M. Vichi, P. Monari, S. Mignani and A. Montanari), Springer, pp. 267-274 (Extended version of the paper presented at CLADAG 2003).
- [34] Bartolucci, F., Mira, L. and Scaccia, L. (2003), Answering two biological questions with a latent class model via MCMC applied to capture-recapture data, in *Applied Bayesian Statistical Studies in Biology and Medicine*, (editors: M. Di Bacco, G. D'Amore and F. Scalfari), Kluwer Academic Publishers, pp. 7-23.
- [35] Bartolucci, F. and De Luca, G. (2002), Estimation of stochastic volatility models, in *Computational Methods in Decision-Making, Economics and Finance* (editors: E.J. Kontoghiorghes, B. Rustem and S. Siokos Editors), Kluwer Academic Publishers, pp. 541-556.
